

Fully Automatic Tie Face Mask Machine

KP-1000&1

Performance Characteristics

- This Machine is Equipped with Heavy and rustles Body structure, Best quality PLC, Servo motor and Ultrasonic. This machine is suitable to make 2 to 5 ply mask Automatically with high speed up to 60pcs per minute with better finishing and without wastage. It has ability to seal tie on mask, gripping, Bunching, and counting face mask, automatically in single time. It increase production 3 time upper than Manual Tie mask machine and decrease the wastage and labor cost.

Main Technical Parameters

Power Supply	Power	Speed	Dimension (in mm)	Weight
AC/220V 50HZ	7KW	20-60 Pcs / Min	MASK MACHINE :-2000 X 600 X 1200 mm FEEDING STAND :-1600 X 550 X 1400 mm	800kg*
