

## Automatic Non Woven Loop Handle Making Machine

### KP-444

### Performance Characteristics

This machine is use full to make & weld the non woven loop handle. This pair is expected to cut into the long and narrow strip and deliver it into the top part of the fold, transportation system using stepper motor. it has a precision to seal & cut and at the same time the accuracy to weld the loop on the bags.

### Main Technical Parameters

Power Supply	Power	Designed Speed	Loop Length	Dimension (in mm)	Working Tem.	Weight
AC220V	3KW	10-30 Pcs / min	380-500 mm	2700*1200*1400mm	<25* C	400kg*
