

Fully Automatic Non Woven Bag Making Machine

KP-555

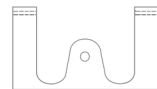

Product Introduction :

This machine is suitable for non woven fabric material, can make automatically non woven bag with different size, as flat bag, D-cut bag, Carry Bag, Shopping bag, Laundry Bag, News paper bag, Gandhi cap & Fruit Cover like for Grapes, Pomegranate, Banana....

Carry Bag Punching Machine

Performance Characteristics

1. This machine adopt touch screen PLC display, PLC program which can be edited.
2. Auto counting meter, could freely setting number.
3. PLC fixed-length, printing color mark track orientation, auto-stop when complete.
4. High voltage static processor, auto constant temperature heating controller.
5. It could control auto pneumatic D-punching on machine.
6. Unwinding magnetic power tension control with manual, auto side-correction control.
7. This machine adopt ultrasonic welding of all aspects, bag mouth folding welding, side sealing, fast speed, Easy to operate and decent look.

Main Technical Parameters

Power Supply	Power	Fabric Gsm.	Designed Speed	Bag Length	Bag Width	Optimum Speed	Dimension (in mm)	Working Tem.	Weight
