

Fully Automatic Non Woven Box Bag Machine

KP-666

Product Introduction :

This machine is suitable for non woven fabric material, can Make automatically non woven bag with different bag size, as flat bag, D-cut bag, Carry bag, Box bag, Laundry Bag, News paper bag, Gandhi cap & Fruit Cover like for Grapes, Pomegranate, Banana, Etc.

Performance Characteristics

1. The Machine adopt touch screen PLC display, PLC computer program which can be edited
2. Auto counting meter, could freely setting number
3. Computer fixed-length, printing color mark track orientation, auto- stop when complete
4. High voltage static processor, auto constant temperature heating controller
5. It could auto pneumatic D-punch,
6. Unwinding magnetic powder tension control with manual, auto side - correction control
7. This machine adopt ultrasonic welding of all aspects bag mouth folding welding, bottom sealing, side sealing, once full completed, fast speed, easy to operate, and decent look.

Main Technical Parameters

Power Supply	Power	Fabric Gsm.	Designed Speed	Bag Length	Bag Width	Optimum Speed	Dimension (in mm)	Working Tem.	Weight
AC220V	15 KW	25-80 Gsm.*	90 Pcs / min	100-700 mm*	200-700 mm*	50-80 Pcs / min*	7000*1900*2300mm	<25* C	3000kg*
